

7S

Classe 7 is designed to combine functionality, ergonomics and a contemporary look. Classe 7 is an essential, versatile machine made from tough materials, such as aluminium and steel, so it is very sturdy and reliable. Available in a 2 groups compact version, or with 2 and 3 groups

The textural finish of Classe 7 components is enhanced throughout, while fully exploiting the technological characteristics of each element. The embossed black base and side panels confer greater assertiveness and personality to the product. To complete the features of this machine, side-mounted shockproof bumpers made from a resilient and sophisticated non-scratch polymer material provide ample protection even when working under pressure. The application of high-gloss stainless steel on the control, front and rear panels of the housing, together with group head covers in chrome-plated Zamak, make Classe 7 an upscale product with a strikingly modern style.

The semiautomatic control on this version ensures the machine is easy to use and reliable in every situation.

The machine has a hot water dispenser with programmable time-controlled dosing.

Classe 7 has an ergonomic lighting system in the work area to make the barista's job easier plus chrome group covers and all the distinctive stylish accessories from the Rancilio range.

Classe 7S - 3 groups - front view

Classe 7S Compact - 2 groups - front view

Classe 7S - 3 groups - rear view

Classe 7S

Technical Features
