Flavor Burst™

Soft Serve Systems

Flavor Burst programs are proven sales builders. With bright, eye-catching ribbons of color and wide variety of flavors, adults and kids alike can find a favorite with Flavor Burst.

The system is easy to install and operate. The operator simply selects the flavor choice (or flavor combinations) from the electronic keypad, then those concentrated flavorings are injected throughout the finished product as it is dispensed. Flavor output and combination flavor timing are adjustable for flow, taste and appearance.

Flavor Burst flavorings are packaged in triple-layer bag-in-box containers for long, stable shelf life that requires no refrigeration. Most operators have found that one gallon of flavoring yields up to 900 servings! New flavors are simple to insert and lock in place and the system is easy to maintain. With clean and sanitize-in-place functions together with easy-to-wipe clean cabinetry, cleaning requires only a few minutes each day.

Expand any soft serve menu with colorful selections of cones, cups, sundaes and more in only 10" next to your soft serve freezer!
